## Innovate Server Monitor

The Innovate Server Monitor is a configurable hosted ArcGIS Server solution that lets you monitor system resources, ArcGIS Server services, and security tokens. In the event of a failure, the Innovate Server Monitor will alert you via email or text message.

## Affordable Pricing and Deployments

### Application Hosted by Innovate (per server):

- \$156/mo with \$340 initial setup fee.
- Includes initial training, 1/hr month support, and 3 months of performance history.
- Requirements: publicly accessible ArcGIS Rest Endpoint, install of small harvest application on target server, and Web Accesable Folder for server performance data harvest.

### Application Hosted at Client Site (per server):

- Same price as above with possible additional expenses (time and materials) for host environment setup.
- Host enviroment runs on IIS 7 and .Net 4.0 Framework, SqlServer Express 2008 with 2GB storage

Stay one step ahead of end users. Identify ArcGIS Server problems before web applications fail.

Remotely monitor all of your ArcGIS services from one central dashboard.

Access server logs and error messages on remote servers.

Quickly test services, add new services, and monitor tokens. Keep your server healthy!
